

# Mini Cat™ MICRO HYDRO

Hotter Than a Pepper Sprout!

The Mini-cat™ **MICRO HYDRO** was designed by Xi Ting, a well known boat racing champion in Asia and is produced by **Mini-Cat Racing USA**. A great deal of trial and error and development went into perfecting the mini-cat **MICRO HYDRO** over a 3 year period. The Mini-Cat™ **MICRO HYDRO** is suitable for beginners or all-out hot dog competitors. The Mini-Cat™ **MICRO HYDRO** is easy to learn to drive and is inherently stable for the fastest of heats and conditions. Its unique compact size makes it easy to carry to the lake and does not require a lot of support equipment such as fuel pumps and starters. It is incredibly economical to run due to the fact that it is electric which saves on the expense of high nitro fuels. Great racing can be done on small ponds and because it is electric, there is little noise so your neighbors won't complain! The **MICRO HYDRO** is the ideal apartment complex racing boat!

The Mini cat™ **MICRO HYDRO** is made of the highest quality **American** epoxy resin and glass fiber, and is stable under all conditions of high temperature and running conditions. It is incredibly strong but weighs only 350g (12.3 oz.) excluding the receiver and running battery. The hull features a gloss gelcoat finish. The Mini-Cat™ **MICRO HYDRO** is available in 7 different colors and can be purchased as Almost Ready to Run (ARTR) which requires minimal assembly and the addition of your own radio, or in a complete Ready To Run (RTR) version with the radio already installed and the running battery and charger furnished (coming soon).

**ARTR (almost ready to run) \$299**

**RTR (Ready to Run) \$TBA with tx and rx, NiMh battery and charger. (coming soon)**
